

Vanish is a very unique access control lock set, where the essentials are housed within the lock case itself. Traditionally, the electronic circuit board and batteries are typically part of the handle escutcheon located on front/back face of the door. The Vanish however sets out to be different, targeting higher specification, modern schemes from a range of sectors such as Residential & Hospitality.

- high security, tamper proof design security deadbolt for added privacy
- RFID key-card/fob & smartphone compatible - latch alarm for improper closing
- Secured by Design, PAS24 security approved - CertiFire, 30/60 mins fire accreditation

A 6mm visual indicator offers the user an LED signal when the door is unlocked and also when the attempted access has been rejected due to expired access privileges for example.

As standard a transparent indicator is included, however optional colours are frosted, black & gold.

Accreditations:

Secured by Design, PAS24 security approved, CertiFire, 30/60 mins fire accreditation

EN 14846:2008 - Electromechanically operated locks & striking plates

EN 50371:2012 - R&TTE, low-power human RF exposure & European EMC, LVD directive

EN 1634-1:2014 - Fire resistance & smoke control for a minimum of 30/60 minutes

Vanish RFID Lock Set

The Opendoor Vanish lock set utilises RFID technology to offer seamless 'contactless' operation, enhancing convenience and ease of use. Its 'low profile' modern design lends itself to new schemes and refurbishment projects - a varying selection of lock sets, fore ends, keep plates and escutcheons aid a simple upgrade from older mechanical keyed systems or outdated, redundant mag-swipe systems.

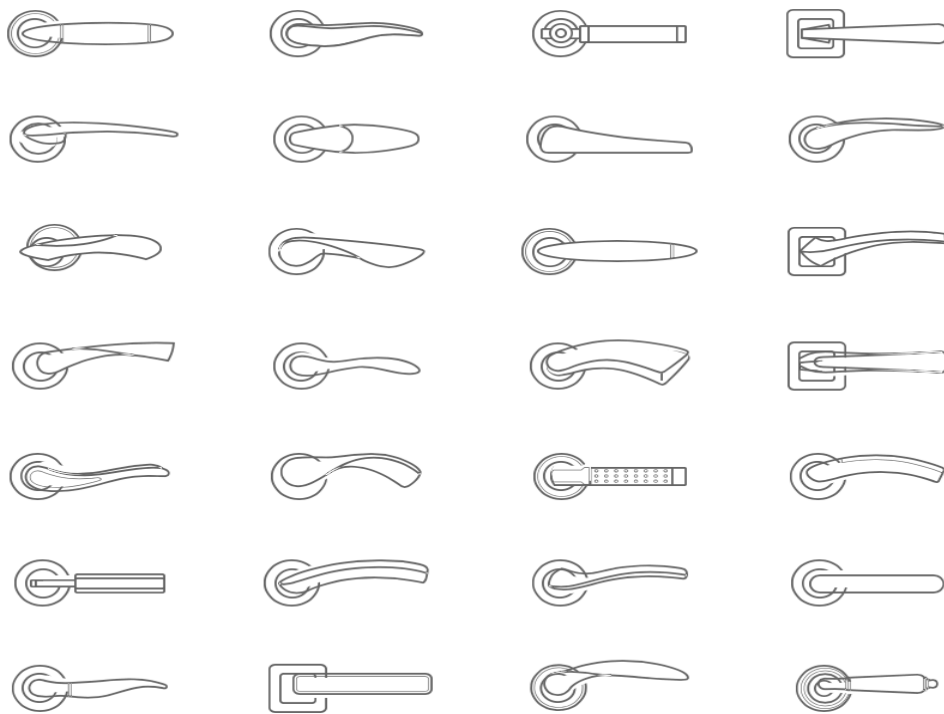

Vanish RFID Lock Set

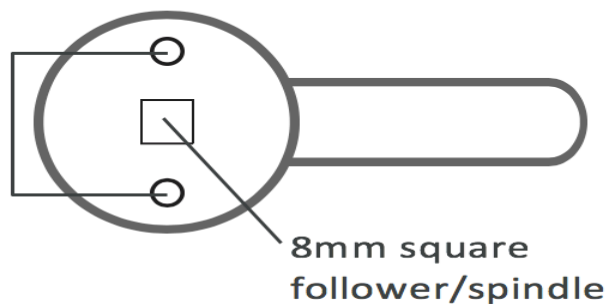

A designers dream - unlike many typical access control handle sets, Vanish by Keystep can be used with any lever on rose you like. Allowing levers to be suited/matching across bedrooms, bathrooms, cupboards, flat entrances etc.

Get creative with style & colour finish, access control no longer restricts choice.

Bolt through fixings are recommended for a secure and long lasting solution, see the illustration for compatible fixing dimensions.
